

WELDING MASK AS-X

FEATURES

- Wide viewing area 91 x 41 mm
- Automatic filter that detects sparks or high-powered lights to darken instantly.
- Dark to light lapse of the filter after welding adjustable between 0.2 and 0.8 seconds, to ensure safety against hot materials.
- Adjustable sensitivity to suit the type of weld and material, always allowing maximum visibility with maximum safety.
- Grinding mode, to protect the user's face when using angle grinders for grinding and dressing weld seams.

ADVANTAGES

- Degree of protection EN169 adjustable from Din 9 to Din 13
- High resistance polymer mask.
- Solar power cell.
- Ready for grinding.

DATA SHEET

Filter dimension	110x90 mm.
Viewing area	91x41 mm.
Protection degree clear state	4 DIN.
Degree of protection dark state	9/13 DIN.
UV / IR protection	16 DIN.
Time from light to dark	1/25.000 s.
Time from dark to light	0.2 - 0.8
Sensitivity	Min-Máx
Use temperature	-5°-55° °C.
Weight	430 gr.
Filter safe wear time	2 años
