

COATED ELECTRODE MINIPRO 100

ADVANTAGES

- Electronic equipment for electric arc welding with coated electrode.
- Simple start-up, even for inexperienced users thanks to its equipment and ease of use.
- Suitable for all types of light and medium jobs in the fields of maintenance, construction.
- Unmatched performance at its price level: 100A continuous, no-load voltage = 66Vdc.
- It incorporates a professional cooling system with thermal stability and maximum performance in its category.
- Solid construction in accordance with European specifications 2011/65 / EU, 2014/35 / EU, 2014/30 / EU and EN 60974.
- Maximum power density

Constant welding
ELECTRODES **2.5 mm**
Duty Cycle 25%

DATA SHEET

Power (A, X = 25%)	100 A
Electrode	1.6 - 2.5 mm
Weight	2.5 kg
Voltage	230 V
Dimensions	13 x 9.5 x 21 mm
DINSE connectors	ø 3/8" (10 - 25)

INCLUDED

- Power cord. 1 m x 1.5 mm²
- Earth cable with clamps 1.5 m x 12 mm²
- Electrode holder cable. 1.5m x 12 mm²
- Hammer with brush

1.5 mx12 mm²

1.5m x 12 mm²
