

## PAINT GUN

### EPG 800

#### ADVANTAGES

- Paint spray gun with separate 800W compressor for all types of painting and varnishing work.
- Independent compressor for more power without weighing down the spray gun. Lighter gun with larger tank capacity and higher spraying pressure.
- The flexible hose has a rotating connection at the gun connection to facilitate the correct pumping of air without hindering the work.
- The spray gun has a paint flow regulator up to 1100 ml/min to adapt to the material being applied and the type of part to be painted or varnished.
- The nozzle has 3 spray modes which are easily selected by rotating the nozzle. The different modes allow you to cover a wider area or concentrate more paint on a specific spot.
- Includes carrying strap for easy carrying of the compressor while working with the spray gun.

3 Positions  
Nozzle

1.8 m

#### DATA SHEET

Power	800	W
Spraying pressure	0.1 - 0.3	Bar
Tank capacity	900	ml
Delivery capacity	1100	ml/min
Maximum viscosity	70	din/sec
Nozzle	ø2.5	mm
Hose	1.8	m
Weight	2.9	kg

#### INCLUDED

- 3 position nozzle
- 1.8m hose
- Viscosity meter
- Carrying strap
- Funnel
- Cleaning wand
