

PAINT GUN

EPG 300

ADVANTAGES

- Lightweight 400W paint spray gun for all types of painting and varnishing work.
- The spray gun has a paint flow regulator of up to 300 g/min to adapt to the material being applied and the type of part to be painted or varnished.
- The nozzle has 3 spray modes which are easily selected by rotating the nozzle. The different modes allow you to cover a wider area or concentrate more paint on a specific spot.
- Includes a locking device to prevent unintentional activation.
- Easy disassembly for quick tank refilling and efficient cleaning of components.
