

# INDUSTRIAL HIGH PRESSURE WATER CLEANER HL 11 B IND

## ADVANTAGES

- High pressure industrial pressure washer (10 litres per minute) with powerful 2400W induction motor, with copper wiring.
- Crankshaft pump with 3 in-line pistons and brass head, to ensure the industrial strength and performance for which the tool was designed.
- Using a water filter the pressure washer can draw water from natural sources such as ponds, rivers or swimming pools, to suit all types of jobs.
- Water pressure regulator to adapt the power of the jet to the material or task to be carried out.
- Motor with integrated thermal protection to avoid overheating problems if the machine runs out of water.
- Industrial components: large detergent tank and 8 metre steel-reinforced hose, the tool has an accessory storage system and includes 5 quick-change nozzles. The gun has a safety lock to prevent accidental activation.

## DATA SHEET

Power	2400 W
Flowrate	10 l/min
Max pressure	200 Bar
Work pressure	150 Bar
Class protection	X5 IP
Weight	34 kg

## INCLUDED

- Reinforced hose 8m
- Spray gun + intermediate lance
- Set of 5 nozzles 0°, 15°, 25°, 40° and soap
- Detergent tank
- Water filter.
