

PROFESSIONAL RANGE

LASER PROFESIONAL

APPLICATIONS

Disc for cutting:

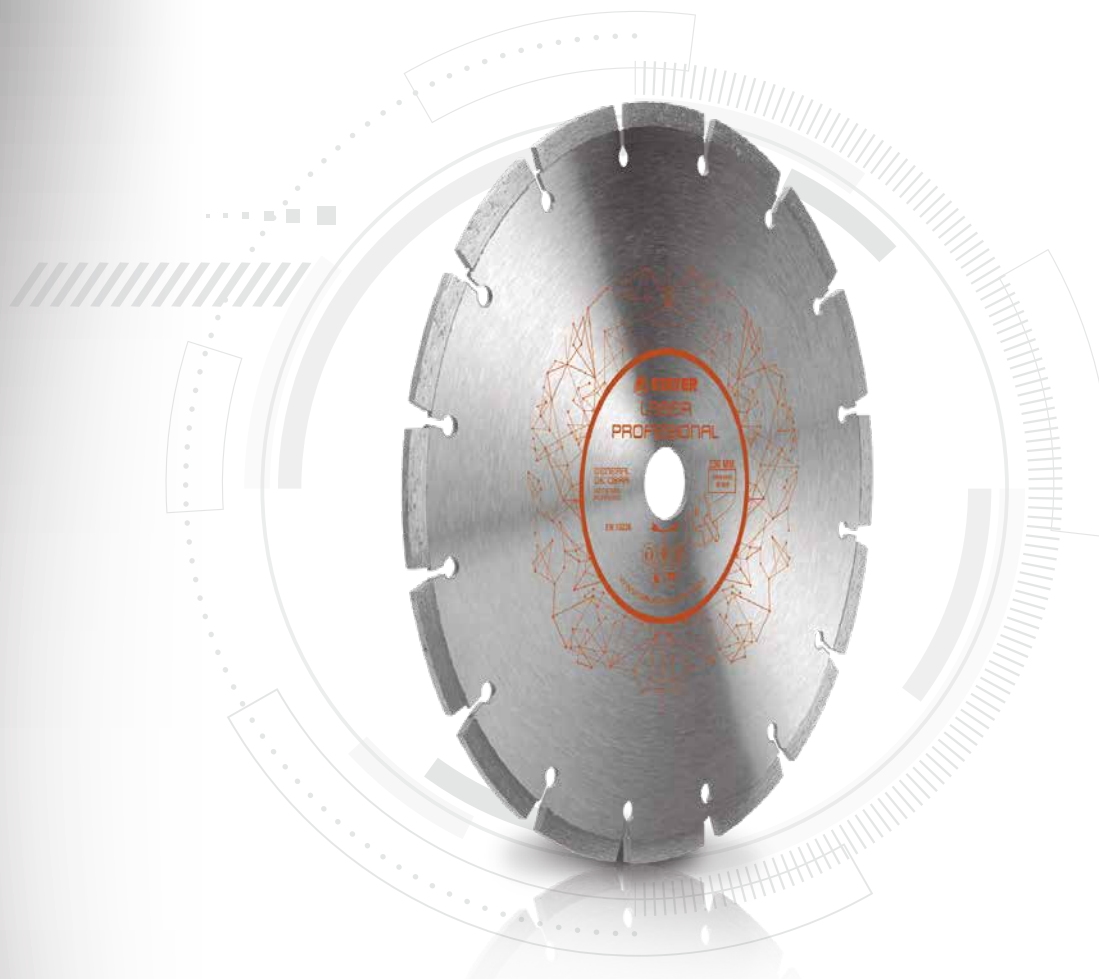

- Cement
- Bricks.
- Refractory bricks.
- Stoneware .
- Terrazzo.

ADVANTAGES

- All kind of materials of low, medium, and medium-high hardness.
- Segmented disc with laser welding, has a longer life and a cheaper cutting cost.
- Diamonds of optimal and uniform quality.
- Minimum level of vibration.
- Reinforced segments.
- Maximum cutting rate.
- Extended duration
- Use of binders that guarantee a high performance of the disc.

SAFETY

- Check that the disc is properly placed in the machine: right sense of rotation, clean and adjusted flanges.
- Never use the disc without the guard protector cover placed correctly and check the safety pictograms on the blade: globes, safety glasses and ear protectors, etc...
- Do not use for curved cuts.
- Check that the rotation speed of the machine is below the maximum rotation speed of the disc.
- Verify that you are using the proper disc for the material to be cut.

DATA SHEET

	 h seg	Segment Thickness		Ø mm	MAX RPM
115	7	2,2	✓	22,2	13300
125	7	2,2	✓	22,2	12250
180	7	2,5	✓	22,2	8500
230	7	2,5	✓	22,2	6650

Fabricated according to the European normative EN13236
